Muhammad Abdullah

SOFTWARE ENGINEER

Okara, Punjab | mabdullah13954@gmail.com | +92 328 0571754 | linkedin:abdullahzeeshan

SUMMARY

Software Engineer with 1 year of experience in designing and developing modern, responsive, and scalable web applications using **JavaScript, React.js, Node.js, Express.js**, **MongoDB**, and **Tailwind CSS**. Proficient in building efficient **RESTful APIs**, designing and managing databases, creating interactive and user-friendly interfaces, and developing complete end-to-end web solutions. Strong foundation in **Object Oriented Programming (OOP)**, Data Structures, Database Design, and software development principles. Passionate about writing clean, maintainable, and scalable code, solving real-world problems, and continuously learning modern technologies to build high-quality and impactful digital experiences.

PROJECTS

Perennials Website Link

- **Tech Stack:** Next.js, JavaScript, Supabase
- Developed a dynamic financial website using **Next.js** and **JavaScript** with a scalable and modular architecture.
- Integrated **Supabase Authentication** for secure user authentication and access control.
- Implemented **Supabase Database** for efficient data storage and management.
- Developed an **Admin Panel** that enables administrators to dynamically add, edit, update, and delete website content without modifying the source code.
- Built a dynamic content management system where changes made through the Admin Panel are reflected across the website.
- Implemented role-based access control to restrict administrative functionality to authorized users.
- Focused on developing a responsive, maintainable, and user-friendly web application.

TourismHQ Hubspot Automation

- **Tool:** HubSpot
- **Tech Stack:** Node.js, Akamai (For Deployment)
- Designed and implemented multiple HubSpot workflows to automate client and user data management.

- Developed and managed **HubSpot** pipelines to provide clients with a clear view of sports users, their details, activities, and overall workflow progression.
- Created multiple automated workflows for handling user data, booking information, status updates, and client-side processes.
- Integrated custom backend services with external APIs to retrieve and process sports-related data before sending it to HubSpot.
- Implemented automated data synchronization logic to check booking codes, validate relevant information, and update existing HubSpot records accordingly.
- Developed API-based integrations to ensure accurate and consistent data flow between external systems, **custom backend** services and HubSpot.
- Automated repetitive business processes to improve data accuracy, reduce manual work, and streamline client operations.

EXPERIENCE

Associate Software Engineer
Invextech, Okara
September 2026 - Present

Developed and maintained full-stack web applications using JavaScript, React.js, Next.js, Node.js, Express.js, MongoDB, Supabase, and Tailwind CSS.

- Designed and implemented scalable REST APIs, responsive user interfaces, and database-driven applications following modern software development practices.
- Built AI-powered automation workflows using n8n, integrating Playwright, LLMs, Google Workspace, and third-party APIs to automate business processes.
- Collaborated with cross-functional teams using Git, participated in code reviews, debugging, testing, and deployment, while ensuring high-quality, maintainable code.

Full Stack Developer Intern (AI)
Invextech, Okara
September 2025 – October 2025

- Assisted in developing full-stack web applications using JavaScript, React.js, Node.js, Express.js, and MongoDB.
- Built and integrated RESTful APIs, implemented responsive user interfaces, and contributed to backend feature development.

- Participated in debugging, testing, and optimizing application performance while following software development best practices.
- Collaborated with senior developers using Git and Agile methodologies to deliver production-ready features.

SKILLS

Programming Languages: JavaScript (ES6+), HTML5, CSS3
Frontend: React.js , Next.js , Tailwindcss
Backend: Express.js, Node.js, Restful APIs
Databases: MongoDB, Supabase
Automation: n8n, GHL, HubSpot, Vapi, Pipedrive, ElevenLabs, yourAtlas
Version Control: Git, GitHub
Tool & Technology: Stripe, Google Maps API, Postman

EDUCATION

Bachelor in **Computer Science** (2025 - Present)
University of Okara
GPA: 3.2

LANGUAGE

- Urdu (**Native**)
- English (**Intermediate**)

CERTIFICATE

Full Stack Developer with **AI** Invextech (2025)
